

Sakshi

MOBILE APP DEVELOPER

Profile

Proficient React Native Developer knowledgeable in redux, reduxSaga, functional components and complex UI elements design and development. Demonstrated success in providing responsive and efficient mobile applications to corporate clients. Clear communicator and collaborative team player with determination to provide the best out of my skills and knowledge .

Employment History

Associate System Engineer, Tata Consultancy Services, Noida

SEPTEMBER 2018 – PRESENT

Solution-driven professional excelling in highly collaborative work environment and possess good technical experience in building products for mobile application users. These mobile apps met with the high standards for applications design, security & user experience and focused on customer satisfaction. I have proven experience in building mobile applications aligned to customer's services using react native and javascript. I further integrated them with the RESTful services, third party SDKs/libraries and local database for persistent storage . I have created functional digital design concepts using react native platform and used various concepts like Redux, Redux-Saga to build efficient mobile applications.
