SAKSHI SAKSHI

FrontEnd Developer

SUMMARY

2+ years experienced FrontEnd Developer highly skilled in user interface development, testing and debugging across the complete development life cycle of a product. Adept at design & development of UI components as per requirement.

PROFESSIONAL EXPERIENCE

Application Development Analyst

Feb '21 - Present

Accenture

Gurgaon, India

I am working as a Frontend Developer and I am responsible for designing, developing, testing, and debugging responsive web and mobile applications for the client using JavaScript, HTML, SCSS, HandlebarsJS, and jQuery. The website also includes multi-lingual support which is achieved by using the i18n generalization service.

FrontEnd Developer

Sep '18 - Feb '21

Tata Consultancy Services

Noida, Uttar Pradesh

- I started my career as a React Native Developer and built 3 ios applications for the client. I was responsible for translating user and business needs into functional UI Components and integrate APIs for connecting the frontend with the backend. The main technologies used in the project were ajax, redux, redux-saga, JSX, and JavaScript. In my next project, I got an opportunity to work as a ReactJS Developer for a Lifesciences client. In this project, my responsibilities included developing a React website for visualizing client data into bar graphs and line graphs. I developed the UI components, made graphs using D3.js, integrated APIs, and played a significant role in deploying the website to production.

EDUCATION

SRM University

Jul '14 - May '18

B.Tech-ECE

Chennai, Tamil Nadu

- Graduated with a cgpa of 9.34

PROJECTS

TODO APP

I made this project as a solution to one of the challenges at frontendmentors.io. The technologies used are NextJS, HTML, SCSS, JavaScript, and Firebase. I used firebase to store the to-do list and learned how to store and retrieve data using firebase. I added dark and light theme support and also made it responsive for mobile, tablet, and desktop. This is deployed using vercel.

COUNTDOWN TIMER

I made this countdown timer in VanillaJS, HTML, and CSS. This was another challenge that I picked from a frontend mentor to practice my frontend skills. The design was made keeping responsiveness in mind. The project is deployed using netlify.

BANANA TRANSLATOR

I made this fun translator using which you can convert plain English into the language of Minions called Banana. I used the API from funtranslations.com and the code is written using vanilla JS, CSS, and HTML. This is deployed using netlify.

DESIGN OF LANDING PAGE OF CROWDFUNDING WEBSITE

Designed this beautiful landing page as a solution to the challenge of frontend mentor. This was designed with a mobile-first approach. I wanted to learn SCSS basics so I styled this webpage using SCSS and learned a lot about the fundamentals of SCSS like

variables, mixins, extends, and partials.
